PROFESSIONAL SUMMARY

Results-driven Software Engineer specializing in the MERN stack and Flutter mobile development. Proven expertise in architecting scalable backend systems, designing secure RESTful APIs, and building highly responsive frontend interfaces. Adept at translating complex business requirements into optimized, user-centric SaaS applications utilizing modern web technologies and clean architecture principles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Dart, HTML5/CSS3
Frontend: React.js, Next.js (App Router), Material UI (MUI), Tailwind CSS
Backend: Node.js, Express.js, RESTful API Design, JWT, RBAC Architecture
Databases: MongoDB, Mongoose, Firebase (Auth, Cloud Storage, Firestore)
Mobile & Tools: Flutter, Git, GitHub, Postman, Figma, VS Code

PROFESSIONAL EXPERIENCE

MERN Stack Developer | Petalnex Nov 2025 – Present

- Engineered robust RESTful APIs utilizing Node.js, Express, and MongoDB, significantly improving data retrieval efficiency for client-facing applications.
- Implemented highly secure user authentication flows using JSON Web Tokens (JWT) and architected Role-Based Access Control (RBAC) systems for granular administrative permissions.
- Developed responsive, high-performance admin dashboards and intuitive user interfaces utilizing React.js, optimizing component reusability and rendering speed.
- Designed and optimized complex MongoDB schemas utilizing Mongoose, ensuring scalable data handling for expanding user bases.

KEY PROJECTS

QR Plate.pk (Restaurant SaaS Platform) | Next.js, React, Node.js, MUI

- Architected a comprehensive multi-branch SaaS platform enabling restaurants to deploy QR-based digital menus instantly.
- Developed a centralized admin dashboard featuring real-time deal countdowns, dynamic category filtering, and optimized responsive layouts for seamless customer experiences.

Dental Suite (Clinical Management SaaS) | Next.js, Node.js, Express, MongoDB

- Engineered a full-stack clinical operations platform streamlining automated appointment scheduling and secure digital patient record management.
- Integrated a secure Node.js backend with a tailored, intuitive UI to optimize daily workflows for medical staff and administrators.

Mental Wellbeing App | *Flutter, Dart, Firebase*

- Developed a cross-platform mobile application delivering mood tracking, guided wellness exercises, and a dedicated doctor consultation portal.
- Integrated Firebase Authentication, cloud storage, and AI chatbot support, ensuring strict data privacy and continuous user engagement.

UAE Prop (Real Estate Platform) | *Next.js (App Router), React, MUI*

- Built a scalable property listing engine equipped with advanced, real-time search filters and a comprehensive seller dashboard.
- Optimized frontend architecture utilizing Next.js App Router and reusable MUI components to facilitate rapid CRUD operations.

Snooker Club (Management SaaS) | *Next.js, Node.js, MongoDB*

- Created an end-to-end management solution featuring real-time table booking, session tracking, and automated billing invoice generation.

EDUCATION

BS Software Engineering | Capital University of Science & Technology (CUST), Islamabad

2021 – 2025
