## PROFESSIONAL SUMMARY

MERN Stack Developer who has shipped 14+ production web applications end-to-end — from MongoDB schema design to deployed admin dashboards — across legal services, e-learning, healthcare, real estate, e-commerce and consultancy. Builds secure JWT/RBAC authentication, multi-role admin and agent portals, and RESTful APIs with Node.js, Express.js, React.js and Next.js. Strong on clean backend architecture, reusable component-driven frontends, and performance-conscious engineering that keeps client platforms fast as data and traffic grow.

## TECHNICAL SKILLS

**Frontend:** React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Redux/Context API, Fast API, Python

**Backend:** Node.js, Express.js, REST API design, JWT Authentication, Role-Based Access Control (RBAC), Multer file uploads, Nodemailer

**Database:** MongoDB, Mongoose, schema design, indexing, aggregation pipelines

**Practices:** SSR/SSG with Next.js, responsive & SEO-friendly UI, reusable component libraries, API performance profiling, CMS-style dynamic content modules

**Tools & Platforms:** Git, GitHub, Postman, VS Code, Figma, Vercel, Antigravity

## PROFESSIONAL EXPERIENCE

**MERN Stack Developer** — Petalnex

*Nov 2025 – Present*

- Develop and maintain scalable RESTful APIs with Node.js, Express.js and MongoDB across multiple client-facing production platforms.
- Design and implement secure JWT authentication and Role-Based Access Control spanning admin, staff, agent and end-user portals.
- Build responsive admin dashboards and reusable, component-driven frontends in React.js and Next.js, cutting duplicate UI work across client projects.
- Model optimized MongoDB schemas with Mongoose to support query-efficient data handling as client platforms grow.
- Profile and tune backend endpoints and database queries to improve API response times and overall application performance.
- Own projects end-to-end — requirements, schema, API, frontend, deployment and post-launch fixes — and hand over admin panels that non-technical clients can run without developer support.

## SELECTED PROJECTS

**NIML Academy LMS** — Learning Management System

*Next.js · React.js · Node.js · Express.js · MongoDB*

- Built a full learning management platform with separate student, instructor and admin roles, course and batch management, and enrollment workflows.
- Implemented secure JWT/RBAC authentication so each role sees only its own dashboard, content and records.
- Developed course content delivery, student progress tracking and an admin panel for managing courses, users and announcements without code changes.

**ClinicNex AI** — AI-Assisted Clinic Management SaaS

*Next.js · Node.js · Express.js · MongoDB*

- Engineered a clinic operations platform covering appointment scheduling, patient records, and role-based access for doctors, reception staff and administrators.
- Integrated AI-assisted features into the clinical workflow to reduce manual data entry and speed up routine front-desk tasks.
- Designed responsive dashboards tailored to clinical workflows, with secure backend APIs for patient data handling.

**Hazara Land** — Real Estate Marketplace Platform

*Next.js · React.js · Node.js · Express.js · MongoDB*

- Built a property marketplace for buying, selling and renting houses, plots, shops and commercial property across the Hazara region.
- Developed agent and admin dashboards with listing management, a verification workflow and lead tracking.
- Implemented search and filtering by city, property type and budget, plus direct WhatsApp lead contact for buyers and agents.

**Abbott Law College Mansehra** — Institutional Website & Management System

*Next.js · Node.js · Express.js · MongoDB*

- Built a full-stack institutional platform covering programs, admissions, scholarships, faculty, and news & events.
- Developed an online application workflow and a downloads centre (date sheets, results) behind a secure internal admin login for staff.
- Implemented dynamic, database-driven modules so non-technical staff publish updates themselves — removing recurring developer requests.

**Andersen Law Firm** — Legal Practice Website

*Next.js · Node.js · Express.js · MongoDB*

- Delivered a professional website for a law firm covering practice areas, attorney profiles and client enquiry handling.
- Built a CMS-style admin area for managing content and incoming consultation requests, with an SEO-friendly, fully responsive frontend.

**Wallrux Consultant** — UK Study Visa Advisory Platform

*Next.js · Node.js · Express.js · MongoDB*

- Built a marketing and lead-generation platform with a university directory, services, blog, FAQ and team sections.
- Integrated WhatsApp consultation booking and intake-deadline countdowns to drive conversions during application cycles.
- Developed a testimonials and success-story module to showcase case outcomes and build prospective-client trust.

**Etsy Product Calculator Tool** — Seller Costing & Quantity Utility

*React.js · Next.js · Node.js*

- Built a calculation tool for Etsy sellers that works out product quantities and amounts from configurable inputs, replacing manual spreadsheet work.
- Focused on instant client-side calculation, input validation and a clean mobile-friendly interface for day-to-day use.

## ADDITIONAL PRODUCTION PROJECTS

- Dental Suite — clinical management SaaS with appointment scheduling, patient records and role-based admin functionality (Next.js, Node.js, Express.js, MongoDB).
- Dr. Website — family-physician clinic platform with online new-patient registration; unified two prior codebases into a single admin and client system.
- UAE Prop — scalable property listing platform with advanced search/filtering, seller dashboards and full CRUD management (Next.js, React.js, Node.js, MongoDB).
- Hydrox Drive — company product website with dynamic, admin-managed content and enquiry capture (Next.js, Node.js, MongoDB).
- Visage Soap — e-commerce platform for a handcrafted skincare brand with product catalog, blog, newsletter and a dealership application flow.
- Snooker Club Management System — table booking, session tracking, billing and automated invoice generation.

## EDUCATION

**BS Software Engineering**

Capital University of Science & Technology (CUST), Islamabad | 2021 – 2025
